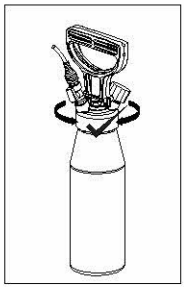
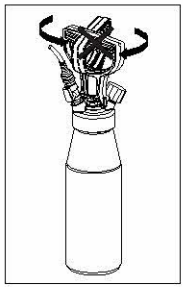
Operation

A) Opening/Closing bottle and filling insecticides:

- To open the bottle, holding the bottle cap then turning it counter clockwise.
- Follow insecticide's label instruction and fill the well mixed water or oil based insecticide into bottle. Avoid powder or any particle in the insecticide to prevent nozzle clogged.
- To close the bottle, holding and turning the bottle cap clockwise till tightening. ***Never open or close the bottle by turning the handle as this may damage the handle seriously.***





B) Pressurizing the sprayer:

- pressing down then ¼ turning the pump handle to unlock the pump handle • pump plunger up and down until the required pressure is reached
- lock the pump handle

C) Application rates of multi-nozzle (measured with water at 40 psi
fine fan ----------360ml/min., 12.2 oz/min., 80
coarse fan ----------760ml/min., 25.8 oz/min., 80
Pin stream ----------330ml/min., 11.2 oz/min
crack & crevice extension straw--------50ml/min., 1.7 oz/min.

Application rates of aerosol nozzle (measured with water, at 60 psi):
fine, white ----------60ml/min., 2 oz/min15-30μm .
medium, blue----------90ml/min., 3 oz/min 30-50μm.
coarse, red ----------130ml/min.,4.4 oz 60-80μm
crack & crevice tip ----------115ml/min., 3.9 oz/min

Repair and Spare Part

- do not modify the sprayer, this may cause a risk of harm and may damage the sprayer
- if any part shows signs of damage or wear, replace it immediately • always use original spare parts for repair or maintenance
