

Operation

- ☒ Remove the vial and fill it only 2/3 full with a insecticide dust.
- ☒ Screw on the vial and shake the duster gently.
- ☒ Squeeze the puffer to escape the dust from discharge tip.
- ☒ 20 inch extension to treat hard to reach area.

Do not full fill the vial, to get a dust floating inside the vial.

Trouble Shooting.

Problem: Not enough dust or granular delivered

- Solution:
- ☒ Shake the duster gently to loosen the content.
 - ☒ Add more dust or granular to the vial.
 - ☒ Use cleaning rod if there is a blockage.

Problem: Dust leaking around cap or extension.

- Solution:
- ☒ Check the cap is well tight
 - ☒ Replace cap or extension if cracked.

Problem: Too much dust or granular delivered

- Solution:
- ☒ Reduce amount of pesticides in the vial.
